

Halloween Safety Tips

Have a "spooky" not scary time!

- 1. Be visible!** Help drivers see you and your kids at night. Wear costumes that glow in the dark or use reflective tape to make costumes shine. Holding a flashlight or glow stick can also help.
- 2. Go with a group!** Join neighbors and extended family when going house to house. Kids should always trick-or-treat with a trusted adult.
- 3. Wear well-fitting costumes!** Costumes should not drag on the ground or block vision. Encourage kids to walk and not run to avoid tripping and falling.
- 4. Stay in a familiar area!** Law enforcement agencies recommend staying close to home. Stop at well-lit houses only. Make sure you can always see your child. Never let them enter a house alone to get a treat.
- 5. Inspect all candy and treats!** Look for signs of tampering or small pieces that may cause choking. Throw away loose candy without original wrappers. Avoid homemade treats from people you don't know.
